Dear All,

As all of you know, we have developed Nano (no-aggregate) Concrete in 2010 and immediately cast the eastern dome totally with Nano Concrete as demonstration structure.

In our urge to take the product to the field for public awareness, we have evolved a program to execute some number of slabs for schools and temples. Under this program we have executed a slab yesterday to the Mandapam of Sree Uyyala Kameswari Devi in Madhupada Village (near S.Kota). Here is attached the link for on-line press note and also reproduced one version of article below:
